

The following is utterly incomplete, but still representative, list of Universities that adopted the book for undergraduate teaching. It shows Universities that referred to the book on the Web as a selected or highly recommended text.

The Web searches were conducted using the google engine. Naturally, the list includes only Universities, which placed the course information on the Web, did not protect the information using passwords or special software (such as WebCT), and were earlier discovered and stored in the google database.

*Google search on June 14, 2002:*

- University of Colorado at Boulder, USA
- Simon Fraser University, British Columbia, Canada
- Technical University of Vienna, Austria
- Ben-Gurion University of the Negev, Israel
