1 The Software Process 00

Objectives 00

1.1 The nature of software development 00
1.1.1 The software development invariants 00
1.1.2 The software development “accidents” 00
   1.1.2.1 Stakeholders 00
   1.1.2.2 Process 00
      1.1.2.2.1 Iterative and incremental process 00
      1.1.2.2.2 Capability maturity model 00
      1.1.2.2.3 The ISO 9000 family of quality standards 00
      1.1.2.2.4 The ITIL framework 00
      1.1.2.2.5 The COBIT framework 00
   1.1.2.3 Modeling 00
      1.1.2.3.1 Unified modeling language 00
      1.1.2.3.2 CASE and process improvement 00
1.1.3 Development or integration? 00
Review quiz 1.1 00

1.2 System planning 00
1.2.1 The SWOT approach 00
1.2.2 The VCM approach 00
1.2.3 The BPR approach 00
1.2.4 The ISA approach 00
Review quiz 1.2 00

1.3 Systems for three management levels 00
1.3.1 Transactional processing systems 00
1.3.2 Analytical processing systems 00
1.3.3 Knowledge processing systems 00
Review quiz 1.3 00
1.4 The software development lifecycle
1.4.1 The development approach
1.4.1.1 The structured approach
1.4.1.2 The object-oriented approach
1.4.2 Lifecycle phases
1.4.2.1 Business analysis
1.4.2.1.1 Requirements determination
1.4.2.1.2 Requirements specification
1.4.2.2 System design
1.4.2.2.1 Architectural design
1.4.2.2.2 Detailed design
1.4.2.3 Implementation
1.4.2.4 Integration and deployment
1.4.2.5 Operation and maintenance
1.4.3 Activities spanning the lifecycle
1.4.3.1 Project planning
1.4.3.2 Metrics
1.4.3.3 Testing
Review quiz 1.4

1.5 Development models and methods
1.5.1 The spiral model
1.5.2 IBM Rational Unified Process
1.5.3 Model-driven architecture
1.5.4 Agile software development
1.5.5 Aspect-oriented software development

Review quiz 1.5

1.6 Problem statements for case studies
1.6.1 University enrolment
1.6.2 Video store
1.6.3 Contact management
1.6.4 Telemarketing
1.6.5 Advertising expenditure
1.6.6 Time logging
1.6.7 Currency converter

2 Requirements Determination
Objectives
2.1 From business processes to solution envisioning
2.1.1 Process hierarchy modeling
2.1.1.1 Processes and process decompositions 00
2.1.1.2 Process hierarchy diagram 00
2.1.2 Business process modeling 00
  2.1.2.1 Flow objects, connecting objects, swimlanes and artifacts. 00
  2.1.2.2 Business process diagram 00
2.1.3 Solution envisioning 00
  2.1.3.1 Solution envisioning process 00
  2.1.3.2 Implementation strategies and capability architecture 00
Review quiz 2.1 00

2.2 Requirements elicitation 00
  2.2.1 System requirements 00
    2.2.1.1 Functional requirements 00
    2.2.1.2 Non-functional requirements 00
  2.2.2 Traditional methods of requirements elicitation 00
    2.2.2.1 Interviewing customers and domain experts 00
    2.2.2.2 Questionnaires 00
    2.2.2.3 Observation 00
    2.2.2.4 Study of documents and software systems 00
  2.2.3 Modern methods of requirements elicitation 00
    2.2.3.1 Prototyping 00
    2.2.3.2 Brainstorming 00
    2.2.3.3 Joint application development 00
    2.2.3.4 Rapid application development 00
Review quiz 2.2 00

2.3 Requirements negotiation and validation 00
  2.3.1 Out-of-scope requirements 00
  2.3.2 Requirements dependency matrix 00
  2.3.3 Requirements–risks and priorities 00
Review quiz 2.3 00

2.4 Requirements management 00
  2.4.1 Requirements identification and classification 00
  2.4.2 Requirements hierarchies 00
  2.4.3 Change management 00
  2.4.4 Requirements traceability 00
Review quiz 2.4 00

2.5 Requirements business model 00
  2.5.1 System scope model 00
  2.5.2 Business use case model 00
  2.5.3 Business glossary 00
  2.5.4 Business class model 00
Review quiz 2.5 00

2.6 Requirements document 00
  2.6.1 Document templates 00
  2.6.2 Project preliminaries 00
  2.6.3 System services 00
3 Fundamentals of Visual Modeling

Objectives

3.1 The use case view
3.1.1 Actors
3.1.2 Use cases
3.1.3 Use case diagrams
3.1.4 Documenting use cases
Review quiz 3.1

3.2 The activity view
3.2.1 Actions
3.2.2 Activity diagrams
Review quiz 3.2

3.3 The structure view
3.3.1 Classes
3.3.2 Attributes
3.3.3 Associations
3.3.4 Aggregation
3.3.5 Generalization
3.3.6 Class diagrams
Review quiz 3.3

3.4 The interaction view
3.4.1 Sequence diagrams
3.4.2 Communication diagrams
3.4.3 Class methods
Review quiz 3.4

3.5 The state machine view
3.5.1 States and transitions
3.5.2 State machine diagrams
Review quiz 3.5
4.2.3 Modeling aggregation and composition relationships
   4.2.3.1 Discovering aggregations and composition
   4.2.3.2 Specifying aggregations and compositions
   4.2.3.3 Example of aggregation and composition specifications
4.2.4 Modeling generalization relationships
   4.2.4.1 Discovering generalizations
   4.2.4.2 Specifying generalization
   4.2.4.3 Examples of generalization specifications
4.2.5 Modeling interfaces
   4.2.5.1 Discovering interfaces
   4.2.5.2 Specifying interfaces
   4.2.5.3 Examples of interface specifications
4.2.6 Modeling objects
   4.2.6.1 Specifying objects
   4.2.6.2 Example of object specifications
Review quiz 4.2

4.3 Behavior specifications
   4.3.1 Modeling use cases
      4.3.1.1 Specifying use cases
      4.3.1.2 Examples of use case specifications
   4.3.2 Modeling activities
      4.3.2.1 Discovering actions
      4.3.2.2 Specifying actions
      4.3.2.3 Example of activity specifications
   4.3.3 Modeling interactions
      4.3.3.1 Discovering message sequences
      4.3.3.2 Specifying message sequences
      4.3.3.3 Examples of sequence specifications
   4.3.4 Modeling operations
      4.3.4.1 Discovering class operations
      4.3.4.2 Specifying class operations
      4.3.4.3 Examples of operation specifications
Review quiz 4.3

4.4 State change specifications
   4.4.1 Modeling object states
      4.4.1.1 Discovering object states
      4.4.1.2 Specifying object states
      4.4.1.3 Example of state machine specifications
Review quiz 4.4

5 Moving from Analysis to Design 00
Objectives 00
5.1 Advanced class modeling 00
5.1.1 Extension mechanisms 00
5.1.1.1 Stereotypes 00
5.1.1.2 Comments and constraints 00
5.1.1.3 Tags 00
5.1.2 Visibility and encapsulation 00
5.1.2.1 Protected visibility 00
5.1.2.2 Accessibility of inherited class properties 00
5.1.2.3 Package and friendly visibility 00
5.1.3 Derived information 00
5.1.3.1 Derived attribute 00
5.1.3.2 Derived association 00
5.1.4 Qualified association 00
5.1.5 Association class versus reified class 00
5.1.5.1 Model with association class 00
5.1.5.2 Model with reified class 00
Review quiz 5.1 00

5.2 Advanced generalization and inheritance modeling 00
5.2.1 Generalization and substitutability 00
5.2.2 Inheritance versus encapsulation 00
5.2.3 Interface inheritance 00
5.2.4 Implementation inheritance 00
5.2.4.1 Proper use of implementation inheritance – extension inheritance 00
5.2.4.2 Problematic use of implementation inheritance – restriction inheritance 00
5.2.4.3 Improper use of implementation inheritance – convenience inheritance 00
5.2.4.4 The evils of implementation inheritance 00
5.2.4.4.1 Fragile base class 00
5.2.4.4.2 Overriding, down-calls and up-calls 00
5.2.4.4.3 Multiple implementation inheritance 00
Review quiz 5.2 00

5.3 Advanced aggregation and delegation modeling 00
5.3.1 Putting more semantics into aggregation 00
5.3.1.1 The ExclusiveOwns aggregation 00
5.3.1.2 The Owns aggregation 00
5.3.1.3 The Has aggregation
5.3.1.4 The Member aggregation
5.3.2 Aggregation as an alternative to generalization
5.3.2.1 Delegation and prototypical systems
5.3.2.2 Delegation versus inheritance
5.3.3 Aggregation and holons – some cerebral ammunition
Review quiz 5.3
5.4 Advanced interaction modeling
5.4.1 Lifelines and messages
5.4.1.1 Accounting for basic technology
5.4.1.2 Visualizing technology contributions in interaction models
5.4.2 Fragments
5.4.3 Interaction uses
Review quiz 5.4

6 System Architecture and Program Design
Objectives
6.1 Distributed physical architecture
6.1.1 Peer-to-peer architecture
6.1.2 Tiered architecture
6.1.3 Database-centered architecture
Review quiz 6.1
6.2 Multilayer logical architecture
6.2.1 Architectural complexity
6.2.1.1 Spatial cognitive complexity
6.2.1.2 Structural complexity
6.2.1.2.1 Structural complexity of networks
6.2.1.2.2 Structural complexity of hierarchies
6.2.2 Architectural patterns
6.2.2.1 Façade
6.2.2.2 Abstract Factory
6.2.2.3 Chain of Responsibility
6.2.2.4 Observer
6.2.2.5 Mediator

Review quiz 6.2

6.3 Architectural modeling
6.3.1 Packages
6.3.2 Components
   6.3.2.1 Component versus package
   6.3.2.2 Component versus class and interface
6.3.3 Nodes

Review quiz 6.3

6.4 Principles of program design and reuse
6.4.1 Class cohesion and coupling
   6.4.1.1 Kinds of class coupling
   6.4.1.2 The Law of Demeter
   6.4.1.3 Accessor methods and mindless classes
   6.4.1.4 Dynamic classification and mixed-instance cohesion
6.4.2 Reuse strategy
   6.4.2.1 Toolkit reuse
   6.4.2.2 Framework reuse
   6.4.2.3 Pattern reuse

Review quiz 6.4

6.5 Collaboration modeling
6.5.1 Collaboration
6.5.2 Composite structure
6.5.3 From use case to composite collaboration
6.5.4 From collaboration to interaction
6.5.5 From interaction to composite structure

Review quiz 6.5

7 Graphical User Interface Design

Objectives

7.1 Principles of GUI design
7.1.1 From GUI prototype to implementation
7.1.2 Guidelines for good GUI design
   7.1.2.1 User in control
   7.1.2.2 Consistency
7.1.2.3 Personalization and customization
7.1.2.4 Forgiveness
7.1.2.5 Feedback
7.1.2.6 Aesthetics and usability

Review Quiz 7.1

7.2 Desktop GUI design
7.2.1 Primary windows
7.2.1.1 Row browsers
7.2.1.2 Tree browsers
7.2.2 Secondary windows
7.2.2.1 Dialog boxes
7.2.2.2 Tab folders
7.2.2.3 Drop-down lists
7.2.2.4 Message boxes
7.2.3 Menus and toolbars
7.2.4 Buttons and other controls

Review quiz 7.2

7.3 Web GUI design
7.3.1 Enabling technology for Web applications
7.3.2 Content design
7.3.2.1 Website to Web application continuum
7.3.2.2 Forms
7.3.3 Navigation design
7.3.3.1 Menus and links
7.3.3.2 Breadcrumbs and navigation panels
7.3.3.3 Buttons
7.3.4 Using GUI frameworks to leverage Web design
7.3.4.1 The MVC dilemma
7.3.4.2 Using Struts technology

Review quiz 7.3

7.4 Modeling GUI navigation
7.4.1 User experience storyboards
7.4.2 Modeling UX elements
7.4.3 Behavioral UX collaboration
7.4.4 Structural UX collaboration

Review quiz 7.4

### 9 Quality and Change Management

#### Objectives

**9.1 Quality management**

- **9.1.1 Quality assurance**
  - Checklists, reviews and audits
  - Test-driven development

- **9.1.2 Quality control**
  - Test concepts and techniques
  - Testing system services
  - Testing system constraints
    - Graphical user interface testing
    - Database testing
    - Authorization testing
    - Testing of other constraints

**Review quiz 9.1**

**9.2 Change management**

- **9.2.1 Instrumenting and managing change requests**
  - Submitting a change request
  - Keeping track of change requests

- **9.2.2 Traceability**
  - System features to use cases and use case requirements
  - Test plans to test cases and test requirements
  - UML diagrams to documents and requirements
  - Use case requirements to test requirements
  - Test requirements to defects
  - Use case requirements to enhancements

**Review quiz 9.2**

**Summary**

**Key terms**

**Multiple-choice test**

**Questions**

**Review quiz answers**

**Multiple-choice test answers**

**Answers to odd-numbered questions**

### 10 Tutorial-style Review and Reinforcement

#### Objectives

**10.1 Use case modeling**

- **10.1.1 Actors**
- **10.1.2 Use cases**
- **10.1.3 Use case diagram**
- **10.1.4 Documenting use cases**
10.2 Activity modeling
  10.2.1 Actions 00
  10.2.2 Activity diagram 00

10.3 Class modeling
  10.3.1 Classes 00
  10.3.2 Attributes 00
  10.3.3 Associations 00
  10.3.4 Aggregations 00
  10.3.5 Generalizations 00
  10.3.6 Class diagram 00

10.4 Interaction modeling
  10.4.1 Sequence diagram 00
  10.4.2 Communication diagram 00

10.5 State machine modeling
  10.5.1 States and transitions 00
  10.5.2 State machine diagram 00

10.6 Implementation models
  10.6.1 Subsystems 00
  10.6.2 Packages 00
  10.6.3 Components 00
  10.6.4 Notes 00

10.7 Object collaboration design
  10.7.1 Use case design specifications 00
  10.7.2 User interface prototyping 00
  10.7.3 Sequence diagram 00
  10.7.4 Design-level class diagram 00

10.8 Window navigation design
  10.8.1 User experience (UX) elements 00
  10.8.2 Behavioral UX collaboration 00
  10.8.3 Structural UX collaboration 00

10.9 Database design
  10.9.1 Object-relational mapping 00
  10.9.2 Referential integrity design 00

Summary 00
Exercises: online shopping 00

Appendix: Fundamentals of Object Technology 00
  A.1 Real-life analogy 00
  A.2 Instance object 00
    A.2.1 Object notation 00
    A.2.2 How do objects collaborate? 00
    A.2.3 Identity and object communication 00
      A.2.3.1 Persistent link 00
      A.2.3.2 Transient link 00
## Contents

A.2.3.3 Message passing  
A.3 **Class**  
A.3.1 Attribute  
  A.3.1.1 Attribute type that designates a class  
  A.3.1.2 Attribute visibility  
A.3.2 Operation  
  A.3.2.1 Operations objects collaborate  
  A.3.2.2 Operation visibility and scope  
A.3.3 Class object  
A.4 **Variables, methods and constructors**  
A.5 **Association**  
  A.5.1 Association degree  
  A.5.2 Association multiplicity  
  A.5.3 Association link and extent  
  A.5.4 Association class  
A.6 **Aggregation and composition**  
  A.6.1 Buried reference  
  A.6.2 Inner class  
  A.6.3 Delegation  
A.7 **Generalization and inheritance**  
  A.7.1 Polymorphism  
  A.7.2 Overriding versus overloading  
  A.7.3 Multiple inheritance  
  A.7.4 Multiple classification  
  A.7.5 Dynamic classification  
A.8 **Abstract class**  
A.9 **Interface**  
  A.9.1 Interface versus abstract class  
  A.9.2 Implementing an interface  
  A.9.3 Using an interface
