Diego Molla Aliod	COMP125
Christophe Doche	COMP115
Ros Ballantyne	COMP125
Louella Almeida	Program Manager
Lisa Chanell	Minutes

UNIT MATTERS

COMP115

Day students have found the unit hard
WebCt has crash last night so assignments will need to be checked

ISYS123

Tutorial & lectures should be in tune with the lectures
Tutors need more guidance
Really good course and no other problems
Excel students need a bit more help in this area
Week 13 will have revision for the exams
There will be a new book for next year

COMP125

Excellent course and thankyou for all the help given
Technical – web mail was not good can attach anything – this is the university
web mail not ICS

There are no java plug INS for the 100 level labs
Tutorials are great but 1 tutorial is not enough should have two

Assignment CC+ & visual – came into the labs and found that it gave a different error message from the system at home – it was suggested that the same version should be used at home

Help101 – should have a link for the units web pages
Service to students regarding help has been excellent

No more meeting for semester 1 2007
